Broadreach Marine and IIMS announce the launch of the Shipbuilding Acquaint Course

The Shipbuilding Acquaint Course has been developed by Broadreach Marine Ltd and is presented exclusively in conjunction with the International Institute of Marine Surveying, the leading worldwide professional body for the marine surveying profession. The course is recognized by the Nautical Institute for CPD points. The aim of this unique one-week online course starting from 7 February 2022 is to provide an opportunity for the student to gain an understanding of modern shipbuilding procedures, from placing a contract to delivering a completed ship.

The course content and objectives can be summed up as follows:

- The Shipbuilding Acquaint Course content follows the logical processes and timeline required to build a ship from scratch.
- For example: it is obviously necessary to have a contract in place before we start building; as it is necessary to complete the design approval before we cut steel and start building the vessel; and to carry out onboard commissioning before we go to sea trials.
- There are 11 Units to this course. Unit 001 is an introduction to the course and a meet and greet session. Units 002 to 010 are the main course content which can be viewed in the prospectus.

About the lead course tutor

Peter Broad has spent his entire 30 years plus career in shipping. He has always worked to the highest possible standards and has led teams to success and enjoys mentoring and educating others. He is the owner and Managing Director of Broadreach Marine Consultants (UK) Ltd and CEO of Broadreach Marine (Korea) Co. Ltd. Peter has authored white papers for Government, two marine engineering-related books, and a number of bespoke marine-related training packages. He is a Chartered Marine Engineer and a Fellow of IMAREST and of the IIMS.

Who should apply?

Applications are sought from individuals who have a basic knowledge of shipping and want to expand their practical knowledge of shipbuilding in particular with a view to embarking on a career in the industry. But applications from those who are working for a shipping company, or related marine industry, such as P&I Insurance Clubs, and who are keen to extend their knowledge in this area are also welcomed.

The course prospectus with full details can be downloaded at <https://bit.ly/3BWKURJ>.

Ends.

About Broadreach Marine Ltd

Peter Broad, Broadreach Marine Ltd, and his team of Technical Consultants based in Korea are working at the leading edge of the rapidly evolving marine market. Their business is the provision of marine services to global shipping clients from their UK and Korean offices, with particular emphasis on Project Management of LNG newbuilds and marine technical consultancy.

About IIMS

Formed in 1991, the International Institute of Marine Surveying is a not-for-profit organisation and the leading worldwide professional body for marine surveyors with a membership of over one thousand surveyors in more than one hundred countries.
